SUMMARY

Computers have always fascinated me. I enjoy learning new things about computers and programming. I am currently working on web programming and I have done many projects for learning purposes. You can check my projects on my github account.

PROJECTS

React Jokes Api

Github Repo : <https://github.com/brkunver/jokes-react-app>

Live Demo : <https://glowing-seahorse-4e1629.netlify.app/>

- A React app that can show jokes from jokes api. And you can change theme
- The purpose of the project is practice some React hooks like useState, useContext, useEffect and useReducer, and api like jokeApi, fetch api and React Context Api

Express-Postresql Blog

Github Repo : <https://github.com/brkunver/express-postgres-blog>

- Express blog app with heroku postgres database
- This app gets title and content of blog posts and show preview in home page, and you can click detail and read more.
- I use Bootstrap, Postgresql, Sequelize, Express and Ejs Libraries in this project

React Youtube Clone

Github Repo : <https://github.com/brkunver/react-youtube-api>
